Do you understand?

This Week's Latest & Greatest

Research is and always has been about the heart. Some men are patient, some men violent. All, if they are great, come to this knowledge, that we inhabit and are inhabited. We confront the infinite mystery with sophrosyne. For my part, I heard the morning birds and could see, crystallizing as I stood limp, the rolling and many-walled vesicles in a sort of marvellous loop that was forever folding. I understood. I am in love with excitement.

Hati the Pilgrim

Akragaç too dim, Jerusalem too bright. Where is our concrete made of glass? Here on Earth, where a man can love the forum, the papers, the schools, the temple. A man spoke once of three elements: Zeus, Prometheus, Oceanids. Do you know? I did. For your part, you have far more reason to know. You took as faith Zeus and maintained Prometheus with vehement resolve. And the last half after the bombs never tired of screaming Oceanids. Listen and rejoice.

Prof. M.

The light is the proof of the advent

Walk, one day, to strange and rugged ground. Look, and you will see the obscure and dour scum growing on the ground and in the pools. The light is the proof of the advent.

Do you see, when you look, the blue haze of the globe, your milieu? Do you feel times falling until so many broken panes merge in your vision, and you lose count in the crystal waves? And do you see, if you lie still for an instant, the webs in webs of coloured light, burning and flowing and structure and life and love?

When you have seen these things, that all men have overlooked hitherto, truly I say to you, you will have more than can be contained by any scripture and any priest.

The Church of Glass by the Sea

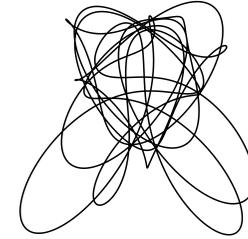

We live victory. Trophionius' challenge will not be ignored. But we will not succumb. No whining and whinging. The pain will be felt and transformed 1000 ways, united by our vision. Vigorous, able, high-minded. What danger could stop us? What exertion could tire us?

Frederick the Pious

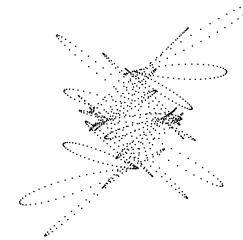

He can learn. And this mystery of learning, this is why there is hope for Io and hope to burn the cycle of the avenger of blood. Every day ἀληθώς ἀνέστη! every day wake up and see the world with new eyes. And we Learn. And Science has no final goal, only the perpetuity of Learning. And the absurdity of Learning without end is its perfect mystery. I love you, I love you all so much.
